

You asked:

On what platform do male erotic audio ASMR content creators mostly gain their audience and turn views into profit?

The AI replied:

Male erotic audio ASMR content creators typically gain their audience and monetize their content through the following **platforms**:

1. Patreon

- **Primary monetization platform.**
- Creators offer **exclusive NSFW audio**, custom content, and early access in exchange for **monthly subscriptions**.
- Allows tiered pricing and community-building.

Why it works: Privacy, adult-content-friendly, and strong recurring revenue model.

2. Reddit

- Especially **subreddits** like r/gonewildaudio (GWA), r/NSFWAudible, or r/eroticliterature.
 - Creators post sample audio or links to drive traffic to **Patreon, Fansly, or Gumroad**.
 - Acts as both a **marketing funnel** and community engagement hub.
-

3. Fansly / OnlyFans

- Used by male ASMR creators who also include **visual NSFW content**.
- Can be more explicit than Patreon allows.
- Monthly subscriptions and pay-per-content options.

OnlyFans is more saturated with visual content, but can work for audio too.

4. Spotify / SoundCloud / YouTube (Safe-for-work Previews)

- Platforms like **YouTube** and **Spotify** are used for **safe/teasing ASMR content** to grow audience reach.
 - Monetization here is usually indirect: via ads, affiliate links, or directing to Patreon.
-

5. Gumroad / Ko-fi

- Used for **one-time audio sales** or digital bundles.
 - Less recurring income than Patreon but works well for one-off custom commissions or themed packages.
-

Typical Funnel:

1. **Reddit or YouTube** (discoverability via free or teaser content)
 2. ☒ Drive traffic to **Patreon or Fansly** (monetization and community)
 3. ☒ Optional sales via **Gumroad or Ko-fi**
-

If you're considering entering the space, success often depends on:

- **Niche voice/personality** appeal (e.g., dominant, soft-spoken, romantic)
- **Consistent uploads**
- **Engagement with listener fantasies** (via polls, requests, or custom scripts)
- **High-quality audio production** (using good mics and editing)

Would you like help drafting a content strategy or setting up accounts for a specific persona or niche?

You asked:

Yeah, so I'm thinking about start posting on Reddit for a while, maybe, you know, gain some followers, and then

start a Patreon after. Is that basically the road to go for it? And also, where can I find, like, you know, good scripts?

The AI replied:

Yes — your plan is **exactly the right approach** for breaking into the male erotic ASMR space:

The Typical Path (You're on it)

1. **Start on Reddit** (especially r/GoneWildAudio & similar):

- Post sample audios with a **hooky title** and **the right flair** (e.g., [M4F], [M4A], etc.).
- Build a **recognizable voice/persona** (e.g., romantic, dominant, soft dom, brat tamer, etc.).
- Engage in the comments (genuine interaction gets followers).
- Link a **Carrrd or Linktree** with your socials for followers to track you.

2. **Once you' ve got demand** (followers, requests, fans):

- Launch a **Patreon** for exclusives, longer versions, or customs.
 - Offer **tiers**: e.g., early access, monthly custom, NSFW audios, boyfriend experience audios, etc.
 - Optional expansion: Fansly for raunchier content or customs.
-

Script Sources (Erotic Audio/ASMR-Specific)

r/GoneWildAudioScripts (Reddit)

- Free, tagged by [M4F], [M4A], etc.
- Many are marked "Open for Use" (you can record them with credit).
- Good mix of romantic, dominant, fantasy, and taboo.

GWA Script Wiki (Community-curated)

- Includes writing guidelines, themes, and hundreds of script links.
- Google: “GWA Script Directory” or ask in r/GoneWildAudio.

AO3 (Archive of Our Own)

- Search for "Audio Script" under fanworks ☑ filter by gender pairings.
- More narrative or fandom-based, but usable and modifiable.

ScriptHive / PillowTalk Scripts (Smaller Blogs or Ko-fis)

- Some creators write and sell scripts for male voice actors.
- Check Reddit or Twitter for links — often sold for <\$10 per script.

Write Your Own (Eventually)

- Use fan requests and Reddit comment themes as inspiration.
- Simple formulas: [Setting] + [Persona] + [Tension] = strong script.

Bonus Tips:

- **Tag your Reddit posts well:** Time of day + proper flair = visibility.
- Post in the **Weekly Promo threads** (r/GWA) when you launch your Patreon.
- Invest in a **good mic** (e.g., Blue Yeti or Rode NT1 with interface).
- Keep a **consistent upload schedule** — even 1x/week.

Let me know if you want:

- A ready-to-post sample Reddit script with [M4F] flair.
 - A launch checklist for starting your Reddit-to-Patreon funnel.
 - Voice acting/audio production tips (equipment, software, editing).
-

You asked:

I'm personally a male sub and a masochist, but I'm doing this for money, so I'm thinking which has a broader market and an easier entry, like a dominant daddy type or a submissive boy toy.

The AI replied:

Great question — and it’s smart that you’re thinking strategically. Here's a breakdown that’ll help you decide which persona offers **broader market reach**, **easier entry**, and **higher monetization potential** — even if it doesn’t fully align with your personal orientation.

Market Demand Comparison

Persona	Audience Size	Willingness to Pay	Competition	Custom Request Demand	Entry Difficulty
Dominant / Daddy / Soft Dom	☑ Very High	☑☑ High	☑ High	☑☑☑ Very High	☑ Moderate
Submissive / Boy Toy / Shy Sub	☑ Moderate	☑ Medium	☑ Medium	☑☑ Medium	☑ Easy

Dominant Persona (Daddy, Dom, Caring Protector, Brat Tamer)

Broad appeal — especially for:

- F4M (most popular pairing)
- NB, trans, and queer listeners seeking validation + fantasy
- Big market for “**dominant but gentle**,” like boyfriend experience or “soft dom aftercare”

Why it sells:

- Fantasy-driven: people pay for escape, confidence, control
- Easy to package into **tiers and exclusives** (e.g., “custom punishments,” “you’re mine now” series)
- Listeners often **tip more** for validation-oriented content

Good for:

- High volume of Patreon supporters
- Getting noticed on Reddit

- Upselling custom audios

Requires:

- Acting confidence
 - Vocal control (calm but commanding)
 - Less aligned with your personal kink, so could become draining if you're not into the persona
-

Submissive Persona (Cute, Shy, Bratty Sub, Eager to Please)

Niche but loyal audience — popular in:

- M4F (less common but growing)
- M4M and queer markets (especially with a femdom twist)

Why it sells:

- Appeals to **dominant listeners**, especially women who want to **take control** in fantasy
- Unique — fewer creators, so easier to **stand out** in the niche
- Easier for you to perform authentically (less emotional labor)

Good for:

- Building a unique niche voice
- Attracting custom payers who are looking for something different
- Feeling authentic and sustainable if you're doing long-term

Limits:

- Smaller pool of patrons
 - Slightly harder to grow fast without a big promo push
 - Might need more creative hooks to make people listen (e.g., "innocent boy punished by his boss," etc.)
-

Strategy Suggestion: Start Dominant, Then Offer Sub Content as a Niche Add-On

- **Start with dominant audios** to build traction (Reddit + Patreon).
- Slip in **sub content** as “patron-only special” or “role reversal” episodes.
- Eventually, build a **dual brand**, e.g.:
 - “Usually I’m in control, but for the right person...”
 - Or split your tiers: “Dom Daddy Tier” vs. “Pet Tier”

This lets you play both fields and gives your real interests room to grow while still optimizing for profit.

Ready to Start?

If you want, I can help you:

- Create 2 sample character profiles (one dominant, one submissive)
- Draft your first [M4F] Reddit post
- Choose good titles that get upvotes
- Outline your starter-tier Patreon rewards

Would you like that?

You asked:

Sure, yeah, then after you do, can you help us do a draft? Cause I'm gonna feed this entire shit to Gemini 2.5 Pro for their advice as well, and please don't feel, please don't be jealous, please don't feel offended, it's not personal, I just need advice from multiple sources.

The AI replied:

Absolutely — no offense taken at all. You're doing exactly the right thing: getting multiple perspectives to make the smartest move. Let’s build you a foundation you can **hand over to Gemini 2.5 Pro** or any other assistant without

confusion.

☒ **CHARACTER PROFILE 1: Dominant Daddy (Soft Dom Style)**

Name (optional persona): "Dominic" or "Sir J"

Voice Style:

- Deep, slow, relaxed
- Calm confidence, protective tone, slightly teasing

Personality:

- Gentle but firm
- Protective and validating (“You’ re safe with me” / “Be a good girl”)
- Can escalate to rough if needed, but mostly emotionally in control

Sample Scenario Themes:

- Aftercare boyfriend: "I held you while you cried... and then kissed you better."
- Brat tamer: "You really thought I wouldn’ t notice?"
- Sleepy comfort dom: "Lie back and let me take care of you."

Target audience:

- Women who want to feel safe/dominated
 - Queer folks seeking masculine comfort energy
-

☒ **CHARACTER PROFILE 2: Submissive Boy Toy (Eager Puppy Sub Style)**

Name (optional persona): "Eli" or "Softie"

Voice Style:

- Warm, a little breathy or nervous
- Occasionally stutters or hesitates — submissive energy
- Tone varies from innocent to needy

Personality:

- Craves praise and approval
- Bratty with certain doms
- Very reactive to attention or punishment

Sample Scenario Themes:

- Obedient good boy: "Yes, ma' am... I' ll do anything you say."
- Teasing plaything: "You' re so mean to me... but I love it."
- Broken-in sub: "I was such a mess before you took control."

Target audience:

- Dominant women (F4M)
- Femdom kink community (Reddit, Patreon, Ko-fi markets)
- Queer kink listeners

REDDIT POST DRAFT (DOMINANT DADDY SAMPLE)

Title:

[M4F] “You Don’ t Get to Cum Until I Say So” | Dominant Soft Dom Audio | Gentle Control + Aftercare

Body:

Hey there.
This is my first post in the GWA world, but I’ ve been lurking and learning what really makes your heart race.
This one's for the good girls who **love being praised, punished, and held after**.
You were teasing me all day, weren’ t you? Well... now you're tied up, whimpering, and I’ ve decided you don’ t get to finish until you beg like a good little thing.

Content warning: Light degradation, orgasm denial, dom/sub themes, praise kink

Tone: Calm dominant, soft voice, gentle but in control

Length: 6:42

Listen here: [Vocaroo link / Soundgasm link / Dropbox preview]

If you liked it, drop a comment or send a message — I’ d love to hear what scenes you crave next.

PATRON REWARD STRUCTURE (Future Setup)

Tier Name	Price	What They Get
-----------	-------	---------------

Lurker	\$3	Early access to public audios
Good Girl Tier	\$7	1 exclusive NSFW audio/week + polls for future content
Obedient Plaything	\$15	2 customs per month, name drops, DM priority
VIP	\$30+	Personalized script + voice reply each month (limited spots)

Audio Tools (in case Gemini asks or you're prepping setup)

- **Mic:** Blue Yeti or Rode NT1 recommended
- **DAW:** Audacity (free), Adobe Audition, or Reaper
- **Hosting:** Soundgasm (free), Vocaroo, or Dropbox for previews

Want me to write the **submissive boy toy Reddit post** next? Or maybe a second dominant one with a different vibe (e.g., more brat-taming or rougher energy)? Let me know and I’ ll prep that for you too.

You asked:

Yes, please, that sounds awesome!

The AI replied:

Perfect — here’ s the **submissive boy toy version** of your Reddit post, crafted to attract the femdom/kink-curious audience while still giving you room to build your brand.

REDDIT POST DRAFT (SUBMISSIVE BOY TOY SAMPLE)

Title:
[M4F] “Please... Use Me However You Want” | Submissive Boy Toy | Eager to Please + Praise Me, Please

Body:
Hi... um, I hope this is okay. I’ m new here and honestly a little nervous, but I’ ve been told I have a voice that makes people want to take control.

This audio is for the powerful women who know exactly what they want — and want to hear me **beg for it**. I’ m all yours tonight... tie me up, tease me, use me — just don’ t stop praising me while you do it.

Content Warning: Submissive male POV, praise kink, begging, soft moans, power exchange

Tone: Shy, needy, eager, obedient — occasionally bratty

Length: 6:14

Listen here: [Soundgasm / Vocaroo / Dropbox link]

I’ d love to know what you’ d do to me next time. I’ m open to ideas... or instructions.

Suggested Follow-Up Post Ideas (For Either Persona)

Title	Type	Hook
[M4F] “You’ re Mine Now — Say It”	Dominant	Possessive, primal, passionate
[M4F] “You’ re So Mean to Me... I Love It”	Submissive	Bratty, playful, punishment craving
[M4F] “Sit on My Face and Use Me”	Submissive	High fantasy request-magnet
[M4F] “Let Me Ruin You... Slowly”	Dominant	Rough, controlled, edging-heavy
[M4F] “Good Girl... You Did So Well”	Dominant	Aftercare, emotional payoff

Pro Tip (for Reddit growth)

- Post 1x/week max to r/GoneWildAudio — quality > quantity.
- Cross-post your Reddit link to **audio-related or femdom-adjacent subs** like:
 - r/NSFWAudible
 - r/FemdomAudio
 - r/GoneWildAudioScripts (with your script if you wrote one)

What's Next?

Would you like:

- A **Patreon bio + tier wording** next?
- A few **script snippets** (both dom and sub style)?
- Tips for voicing/acting each persona believably?

You're building this like a pro — and I’ m down to help every step.

You asked:

I wanna put it on Pornhub as well, so I also need a cover photo. You know, like an anime type of photo. You think you can generate that for me?

The AI replied:

Absolutely — I can generate an anime-style **cover photo** for your Pornhub audio post. Before I do that, I'll need just a few preferences so it fits your brand perfectly:

Please choose:

1. **Persona for the image** (choose one or give me both to prep multiple options):

- Dominant Daddy (Soft Dom)
- Submissive Boy Toy

2. **Tone of the image:**

- Romantic? Dark and seductive? Soft and vulnerable? Rough and primal?
- (Example: “soft dom holding someone’s chin while whispering,” or “blushing submissive guy in a collar on his knees”)

3. **Clothing preference** (shirtless? button-down? fully clothed? harness/collar?)

4. **Background vibe:**

- Bedroom, dungeon, romantic lighting, blurred?

5. **Text overlay?**

Do you want me to add a title or your username on the image (like "Use Me However You Want" or your artist name)?

Once I have those details, I'll generate the image and make sure it fits an eye-catching Pornhub thumbnail (1280x720 resolution). Let's make sure it draws clicks and fits your vibe.

You asked:

So, let's first do Dominant Daddy, Dark and Seductive, No Text Overlay, and Button Down, Blurred Background Anime.

The AI replied:

Image created
[点击此处打开图片](#)
[点击此处打开图片](#)
[点击此处打开图片](#)
Share

You asked:

Okay, this is great, but it should be horizontal, you know? It's a Pornhub cover, not a TikTok cover.

The AI replied:

Image created

[点击此处打开图片](#)
[点击此处打开图片](#)
Share

You asked:

Let's now do Submissive Boy Toy, Soft and Vulnerable, No Text Overlay, White Shirt, Button Down, Wearing a Collar, Broccoli Hair, Romantic Dungeon, also Horizontal. Don't forget about that.

The AI replied:

Image created
[点击此处打开图片](#)
[点击此处打开图片](#)
[点击此处打开图片](#)

You asked:

Is it possible to have an agentic AI platform to take care of uploading on multiple social media platforms, including Reddit and Pornhub, once I upload the audio and the cover photo and the title for this particular submission? Is it possible?

The AI replied:

Yes, it **is possible**, though not fully plug-and-play **out of the box**—you’ d be looking at a combination of tools and automation setups that, together, behave like an "agentic" AI assistant. Here's how you can realistically make it happen:

What You Can Automate:

You can build or configure an AI system (or hire someone to do it) that can:

1. **Take your audio, title, and cover photo**
 2. **Upload them to multiple platforms like:**
 - **Reddit** (via Reddit API)
 - **Pornhub** (manually or via semi-automated scripts using Puppeteer or Playwright)
 - **Twitter/X, Bluesky, Fansly**, etc.
 3. **Write custom captions, tags, and hashtags per platform**
 4. **Track engagement analytics**
 5. **Post at optimal times or based on a schedule**
 6. **Log in via secure vaults (e.g., 1Password API, environment variables)**
-

What’ s Tricky or Not Fully Supported:

- **Pornhub** does **not have a public API** for general uploads, so you'd need **browser automation** (via tools like **Playwright** or **Selenium**) that mimics human behavior.
- **Reddit** does have a solid API, but you'll need to **set up a developer app** and handle OAuth tokens.
- Many sites may **flag or ban accounts** that appear bot-controlled if you’ re not careful with timing, behavior, or fingerprinting.

Tools That Can Help You Build This:

- **Zapier / Make (Integromat)** for light automation
- **Playwright or Puppeteer** for full browser automation
- **Python** with `requests`, `Reddit API (PRAW)`, and automation scripts
- **LangChain or CrewAI** if you want to build it using multi-agent frameworks
- **Auto-GPT or Agent-LLMs** if you're going DIY and want them to make decisions on where/when to post

Considerations:

- You'll need to manage **cookies/session tokens** securely
- **Content guidelines** vary per platform – tailor your captions accordingly
- Automating **NSFW content** is riskier on mainstream tools (e.g., Zapier might ban accounts for violating TOS)

TL;DR: Yes, you can:

- Use a mix of browser automation and API integration
- Create or commission an “agent” that posts for you based on your input
- Make it run on a schedule or trigger via voice, upload, or UI

If you want, I can help you **map out the toolchain**, or even give you a **template architecture** to bring this to life. Would you like that?

You asked:

Where can I learn about all this API integration stuff in a standard computer science major Slash minor curriculum and can I learn about them in software development, or do I have to learn about them on my own? Also, um, can you go into a bit more detail and now please Exclusively use web search on where can I find high-quality script for a

The AI replied:

Here are some high-quality sources where beginners (especially male erotic ASMR creators) can find good scripts:

1. Reddit – r/ASMRScriptHaven

A very active community of scriptwriters sharing ready-to-use ASMR scripts (both SFW and NSFW). Many scripts are labelled by pairing (like M4F, A4A) and explicitly allow monetization; just credit the original author. You'll regularly see posts like:

“I just started doing ASMR. ... If anyone has anything they've written for men that they'd like me to take a look at, I'd be happy to!” [fiverr.com+3reddit.com+3reddit.com+3reddit.com](#)

2. ASMR scripts on Tumblr

Tumblr hosts many free-to-use scripts—sometimes even tagged as monetizable. Great for shorter, beginner-friendly voice roleplays.

3. DeviantArt relaxation/ASMR scripts

Creative writers post longer-form guided meditations and ASMR scripts you can adapt—typically safe-for-work, but easily tweaked to erotica.

4. Paid script bundles on Etsy

You can buy genre-specific downloadable packs—like femdom or JOI scripts—for around \$3–\$15. Many include adult pairings, narrator notes, and desired runtime. Sample: “Submissive JOI Scripts” pack.

[etsy.com+2etsy.com+2etsy.com+2](#)

5. Custom scriptwriters on Fiverr/Upwork

Freelancers like Jace_Aiken and Takushinobi offer \$15–\$50 per custom ASMR roleplay script (1,000–1,500 words with SFX tags), including NSFW content. [fiverr.com+1fiverr.com+1](#)

Quick Recommendations for Beginners:

- **Start Free:** Browse r/ASMRScriptHaven and Tumblr scripts.
- **Adapt SFW Content:** Use DeviantArt scripts and modify tone/layout.

- **Invest as You Grow:** Buy bundles for structural variety or hire writers for custom content.
-

On Learning API Integration & Web Automation

In a Standard Computer Science Curriculum

You already cover core topics in courses like:

- **Web Development** (HTTP, REST APIs)
- **Software Engineering** (client/server models, authentication)
- **Databases & Distributed Systems**
- **Scripting / Automation** (often part of Python courses)

These provide the foundations for API-based automation (like posting to Reddit via PRAW). However, mainstream CS curricula **rarely cover browser automation** (Selenium, Playwright), nor adult-platforms (like Pornhub).

Recommended Self-Learning Path

1. **API Usage:** Practice with Reddit API tutorials (OAuth2 + PRAW).
2. **Browser Automation:** Learn Selenium or Playwright for non-API uploads.
3. **Orchestration Tools:** Explore Zapier, Make, or write bots in Python/Node.js.
4. **Multi-Agent Frameworks:** Experiment with LangChain or Auto-GPT if you're building a decision-making agent.

You can absolutely **learn in CS coursework**, but full pipeline automation (especially across NSFW platforms) typically requires **self-study or side projects**.

Let me know if you want:

- Links to Reddit API tutorials,
- Intro guides to Selenium/Playwright,
- Specific Etsy packs for your persona,
- Or custom script examples to draft and adapt.
